heart|wood

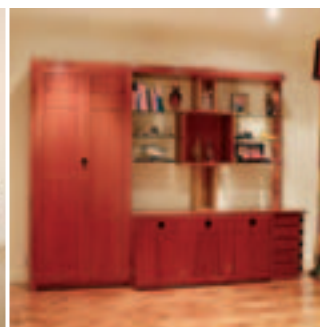

design

Our 'Signature Collection' brings together some of the more popular design ideas exclusive to heartwood. Or, with over ten years experience in custom design, we can develop a creative solution or a spectacular 'one off' for your specific needs.

craftsmanship

Starting with the selection of the timber, each stage of construction is approached with meticulous care. Boards are chosen with careful attention to the position they will be placed, to ensure a visual balance of figure and harmony of colour variation. Mortise and tenon, dovetails and bridle are commonplace in our construction process and, when combined with modern adhesives, they are a guarantee that your furniture will last for generations.

timbers

We specialise in the use of Australian native species. Our collection covers a wide range of colours and characters providing opportunities for both matching existing furniture and for creative design ideas. We also have rare and unusual materials for something really special, or eye-catching.

finish

Delicate figure and subtle colour variation in the timbers require a very fine finish. We apply no less than four coats (and up to nine!) of oil based finishes that provide the best combination of durability and appearance. This technique is carried out entirely by hand with consistently stunning results. Each piece is then numbered with a brass plate and registered in our archive.
